

MORE SHELF SPACE FOR ORAL TOBACCO

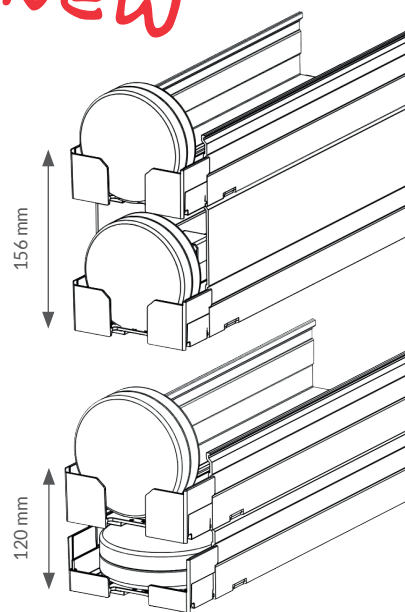

WITH THE POS-T STACKING CHANNEL

Maximum impact in minimum space: The modular POS-T Stacking Channel for oral tobacco cans (68 – 73mm) puts your products firmly in the spotlight at the point of sale. With its low installation height, the channels can be used even with shelf spacing as little as 125mm – making optimal use of your sales area, whether upright or lying flat.

The integrated pushfeed system ensures your products remain perfectly visible and within easy reach at the very front. Refilling and removing products is effortless – with no slipping or misalignment of the packaging. And thanks to quick installation on all POS-T Adapter-T profiles, you enjoy maximum flexibility in every placement.

Your benefits:

- Perfect visibility
– focus on your products, increase purchase impulses
- Efficient use of space
– full product range even on lower shelves
- Flexible presentation
– upright or flat, always suited to your retail environment
- Reliable stock availability
– products always ready and within reach
