Top spot for your
ice cream cups!

Make. Shopping. Simply. Better.

Perfect presentation at the highest level

POS-T SKADI LIFT

The POS-T Skadi Lift transforms your freezer section into a high-impact sales area, turning ice cream cups into true attention-grabbers. Its clean, organised look and perfect product visibility ensure that items immediately catch the eye and invite customers to pick them up.

The innovative lift mechanism gently raises the cups, keeping them always at optimal reach. Customers can serve themselves comfortably, while your staff work ergonomically, efficiently, and without strain—no lifting, bending, or twisting required. Automatic front-loading keeps the display consistently stocked, ensuring maximum visibility, better organisation, and increased impulse purchases.

The POS-T Skadi Lift is available in two versions, designed to fit a variety of chest freezers: A compact version holds 3 ice-cream tubs (420mm overall height, 370mm cooling limit, 335mm fill capacity), while the larger version accommodates up to 4 ice-cream tubs (530mm overall height, 480mm cooling limit, 445mm fill capacity).

Its intelligent construction guarantees consistent cooling without temperature fluctuations, reliably protects against freezer burn, and reduces energy consumption thanks to its efficient design. Refilling and installation in standard freezer chests is quick and hassle-free.

With its modern, technical design, the POS-T Skadi Lift conveys innovation and professionalism. Branding-friendly front panels enhance brand visibility and draw attention to your products. This transforms your freezer section into a premium sales area that delights customers, boosts sales, and makes daily work easier for your staff.

Your benefits

- **Maximum visibility & sales:**
Products always in view, fronts fully stocked, clean presentation – for better organisation and increased impulse purchases
- **Ergonomics & efficiency:**
No bending, no lifting – effortless access and restocking for both customers and staff
- **Consistent cooling & product protection:**
Prevents quality loss and freezer burn
- **Quick, hygienic replenishment:**
Easy refilling, products ready for immediate display
- **Strong brand impact at the point of sale:**
Modern design with branding-friendly front panels for an optimised brand presence
- **Cost-efficient & flexible:**
Energy-efficient, universally retrofittable, and easily integrated into existing store designs
