

MAXIMUM IMPACT ON THE SHELF THE DOUBLE-STACK PRESENTER FOR HEALTH & BEAUTY

NEW

WITH POS-T SUPERVARIO PURE

The POS-T SuperVario Pure brings lightness and versatility to your health & beauty shelving. Its transparent design puts products centre stage, creating a modern, premium look at the point of sale. Perfect for products between 60 and 106mm wide – ideal for creams, jars and boxed products.

The open design enhances visibility, keeps shelves neat and organised, and maximises product impact. Thanks to the flexible, tool-free adjustable channel width, the system can be quickly adapted to different product sizes. The double-stack design makes the most of the available shelf space: the lower level accommodates products up to 90mm high, creating more facings and maximising product variety within the same shelf footprint.

Your Benefits:

- Greater transparency and a premium shelf appearance
- Optimal product presentation without distraction
- Improved shopper navigation at the point of sale
- Flexibly adjustable width
- More facings thanks to the double-stack design
- Efficient use of available shelf space
